

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

VT Argonaut Absolute Return Fund (the "Fund")

a sub-fund of VT Argonaut Funds (the "Company")

Class A Accumulation Shares (USD) (Currency Hedged) (ISIN: GB00BN722818)

The authorised corporate director of the Fund is Valu-Trac Investment Management Limited

Objectives and Investment Policy

The investment objective of the Fund is to provide positive returns over a 3 year period, regardless of market conditions.

Capital invested in the Fund is at risk and there is no guarantee that the investment objective will be met over a 3 year, or any other period.

The Fund may, at times, invest in a relatively small number of equities, the selection of which will not be restricted either by size, industry, or geographical location of the underlying companies, although exposure is expected to be mainly (over 50% of gross exposure) to companies incorporated in Europe.

The Fund may take investment exposure to equities, fixed interest instruments, collective investment schemes (which may include those managed/operated by the ACD) cash and near cash (which includes money market instruments and deposits in any currency.

Any such exposures could be gained by direct investment or through funds or derivative instruments.

In pursuit of its investment policy, all or a substantial proportion of the Fund's assets may consist of cash, near cash, deposits, warrants and/or money market instruments.

The Fund may use derivatives and forward transactions (that is sophisticated investment instruments linked to the rise and fall of the price of other assets) for the purposes of meeting the investment objective or efficient portfolio management.

The Fund is not managed against any formal benchmark. The Fund uses the Investment Association's (IA) IA Targeted Absolute Return Sector for performance comparison purposes only ("Performance Comparator"). The Performance Comparator is not used as a performance target or as a constraint in relation to the composition of the Fund's portfolio.

The Performance Comparator was chosen because it enables investors to compare the performance of the portfolio against competing funds in the same sector.

The Fund will be actively managed.

Save as noted above, the Fund will not have any particular geographic, industry or economic sector focus and as such weightings in these may vary as required.

You can buy and sell shares in the Fund on any business day.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area of the table below shows where the Fund ranks in terms of its potential risk and reward based on historical data.

Historical data may not be a reliable indicator of the Fund's future risk profile. The risk category shown is not guaranteed and may change over time. The lowest category does not mean "risk free".

The Fund is ranked 6 because historical performance data indicates that significant rises and falls in market prices would have occurred historically.

The following risks are material in addition to the risks captured by the indicator above:

- Counterparty risk: The Fund can conclude various transactions with contractual partners. If a contractual partner becomes insolvent, it can no longer or can only partly settle unpaid debts owed to the Fund.
- Market Risk: External factors can cause an entire asset class to decline in value which would result in a decrease in the value of investments.
- Currency Risk: As the Fund may invest in overseas securities, movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Liquidity Risk: adverse market conditions may affect the ability to sell certain assets when necessary. Reduced liquidity may have a negative impact on the price of assets.
- Derivatives risk: use of derivatives may result in gains or losses that are greater than the original amount invested

For full details of the Fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
